PROFILE

Software developer with two years of professional experience building industrial line-of-business applications in C# and .NET. Core strengths are desktop development with WPF, UWP and the MVVM pattern, data access through Entity Framework Core and Microsoft SQL Server, and running and migrating application components on AWS.

Currently porting an established UWP application to Blazor, with a single-codebase interface optimised for phone, tablet and desktop. Bachelor of Science (Hons) in Games Programming.

PROFESSIONAL EXPERIENCE

Software Developer (since 09/2026)

werusys Industrieinformatik GmbH & Co. KG, Cologne, Germany (hybrid) | Since 09/2024

Software Developer (since 09/2026) · Junior Software Developer (09/2024 – 08/2026)

- Develop and maintain industrial desktop applications in C# and .NET using WPF, UWP and the MVVM pattern.
- Build and maintain the data access layer with Entity Framework Core, Mindscape LightSpeed and Microsoft SQL Server.
- Client project in an industrial setting: migrated the reporting stack from SQL Server Reporting Services on an AWS RDS Option Group to dedicated EC2 instances; independently diagnosed and resolved SQL authentication, SSL trust and report catalog hosting failures, and documented the full migration in Confluence.
- Porting an established UWP application to Blazor: component decomposition, replacement of UWP-specific APIs, and a responsive interface serving phone, tablet and desktop from one codebase.
- Work in a Scrum team using Jira, Azure DevOps (repos, pull requests, code reviews) and Confluence.

C# Trainee

MSA GmbH, Niederkassel, Germany | 07/2024 – 08/2024

- Developed a cross-platform desktop application in .NET using Avalonia and MVVM.
- Wrote epics and user stories in Jira and technical documentation in Confluence.

Player Success Agent

G-Loot, remote | 06/2021 – 01/2022

- Provided English-language support for an international gaming platform through Zendesk.
- Carried out manual anti-cheat reviews and filed structured bug reports to the development teams via Jira.

League Operations

G-Loot, remote | 04/2018 – 06/2021

- Planned and ran international online tournaments in coordination with teams across several time zones.
- Provided IT and setup support at offline events, including Gamescom.

PROJECTS

Docs Q&A Assistant for .NET Developers

Retrieval-augmented generation application in C# and .NET 8 using Semantic Kernel with Qdrant as the vector store; full technical design from requirements analysis through to architecture.

Mixed Reality Roguelike Shooter (bachelor's thesis)

Built a mixed reality game with the Oculus SDK and Unity as the practical component of the bachelor's thesis.

EDUCATION

Bachelor of Science (Hons), Games Programming

SAE Institute Cologne, Germany | 03/2022 – 03/2024

Thesis: Creating a Mixed Reality Roguelike Shooter with the Oculus SDK

Advanced Diploma, Games Programming

SAE Institute Cologne, Germany | 03/2022 – 09/2023

TECHNICAL SKILLS

Languages: C#, C++, SQL, JavaScript

.NET & UI: .NET 8, .NET Framework, Blazor, WPF, UWP, Avalonia, MVVM, XAML, HTML, CSS, responsive UI design (phone/tablet/desktop)

Data: Microsoft SQL Server, Entity Framework Core, Mindscape LightSpeed, SQL Server Reporting Services

Cloud & operations: AWS (EC2, RDS), Windows Server, IIS, MSMQ

AI & ML: Retrieval-augmented generation, Semantic Kernel, Qdrant

Tools & methods: Visual Studio 2022, Azure DevOps, Git, GitHub, Jira, Confluence, Scrum, code reviews

Game development: Unity, Unreal Engine, OpenGL, Vulkan, Oculus SDK

LANGUAGES

German: Native speaker

English: Fluent, written and spoken
